Subject: Job opportunity - bioinformatics
To: <TAU-BIOMED-RESEARCH@listserv.tau.ac.il>

Silicon Valley - Israeli startup develops a biosensing platform that will usher the age of digital / personalized medicine.

The company is funded by top-tier venture capitals and led by a team of serial entrepreneurs, biotech experts, and big-data leaders.

We are looking for exceptional candidates for several positions in our company:

- Software engineers / Algorithm developers

- Bioinformatics / Data scientists / ML researchers

Requirements:
• M.Sc./Ph.D. degree in CS / physics / computational biology / bioinformatics
• Strong analytical & computational skills
• Experience in data analysis, confronting models with measurements
• A team player, ability to work independently
